

## PDST Chemistry Autumn 2019 Workshops – Professional Learning Community

PDST is delighted to support chemistry teachers by providing an opportunity to set up a **Professional Learning Community (PLC)** for teachers to work collaboratively with colleagues, exchanging resources and ideas for teaching Senior Cycle Chemistry. This workshop will:

*Establish a secure teacher learning environment*

*Provide an opportunity for the sharing of methodologies and assessment approaches*

*Support teachers in embedding digital technologies into their practice*

*Enable students to become engaged thinkers and active learners*

Recent trends have shown an increasing emphasis on the importance of **Numeracy in Chemistry**. Strategies to solve Volumetric Analysis and Stoichiometric calculations will be considered. An **update of the online resource portal** and some **Transition Year resource ideas** will also be available on the night.
