

**The Autumn Workshops are designed to:**

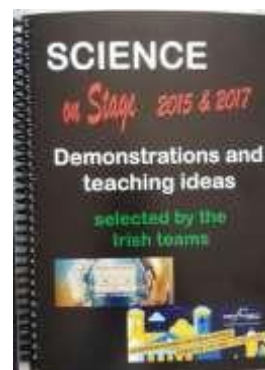

- Support learners of all backgrounds, ability and gender, and equip them with the skills needed to participate in our changing world
- Afford teachers the opportunity to develop their own resources, and share and discuss them in the workshops
- Consider Scoilnet as a reference point for teachers, and encourage its use as a repository for teacher produced resources (as prioritised in the Digital Strategy for Schools 2015-2020).
- Create an environment whereby teachers can learn from each other
- Promote an inquiry based approach to teaching and learning
- Discuss how active learning methodologies can be used to inform the implementation of a project-based learning approach
- Support teachers in embedding digital technologies into their practice
- Enable students to become engaged thinkers and active learners
